

COVID-19 Antrim County Monthly Summary – September 2020

The purpose of this monthly summary is to provide you with more information regarding cases referred to the health department over the past month. Information is obtained through the Michigan Disease Surveillance System (MDSS). Data provided is for confirmed cases only unless otherwise noted as probable.

There was an increase in confirmed COVID-19 cases this month.

The majority of cases were symptomatic during their course of illness.

Please note: Symptomatic and Asymptomatic are both contagious

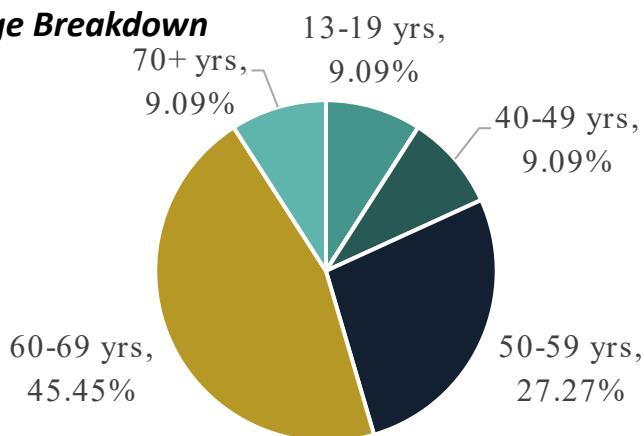

The most common symptoms were cough, fatigue, and muscle aches.

Known source of exposure has been identified for more than half of the cases.

1	2 cases were associated with a named outbreak
2	Of those unassociated with an outbreak, 4 cases were household contacts meaning they are connected to another positive COVID-19 case <u>within</u> the same household.
3	Of those unassociated with an outbreak, 1 case was a community contact meaning they are connected to another positive COVID-19 case <u>not within</u> the same household.
