

# COVID-19 Emmet County Monthly Summary – November 2020

The purpose of this monthly summary is to provide you with more information regarding cases referred to the health department over the past month. Information is obtained through the Michigan Disease Surveillance System (MDSS). Data provided is for confirmed cases only unless otherwise noted as probable. \*Starting November 24, 2020, we began reporting total COVID-19 cases, which includes the sum of confirmed and probable cases. This report reflects that change.

**There was an increase in total COVID-19 cases this month.**

**The majority of cases were symptomatic during their course of illness.**

\* Symptomatic and Asymptomatic are both contagious.

**The most common symptoms were fatigue, congestion, and loss of taste.**

**Known source of exposure has been identified for less than half of the cases.**

- 132 cases** were associated with a named outbreak
- Of those unassociated with an outbreak, **135 cases** were household contacts meaning they are connected to another positive COVID-19 case within the same household.
- Of those unassociated with an outbreak, **73 cases** were community contacts meaning they are connected to another positive COVID-19 case not within the same household.

**Age Breakdown**

**Emmet County Cases by Month**

\*Began reporting total cases in November
